Year One Term 3 Newsletter

Dear Parents/Caregivers,

This year is going quickly and the students are making fantastic progress.

This term we will be concentrating on report writing and narrative writing in English as well as continuing with our spelling and home reading program. In Maths we will be introducing multiplication and division concepts and fractions. We are also looking at informal and formal units of measure and the students will be participating in lots of hands-on activities.

Geography will be a focus this semester and we will be learning about landmarks in our local area and introducing the children to some distinctive features of the world. This will include identifying and locating the equator and the hemispheres, including the poles on a map or globe.

As part of our Health program this term, students will be introduced to the ‘You Can Do It’ program and learning about the 5 Keys to Success. They will also be focusing on safety within the home and community.

In Science, we will be learning about Biological Sciences and exploring the school yard and our own backyards to find all the creatures that live there. We will also be learning about and comparing their habitats.

Just a reminder that the Junior Athletics Carnival is on Friday morning, the 2nd of September. Students will be bringing home the program, with their events highlighted, closer to the date.

Congratulations to Room Two for their amazing assembly. Be prepared to be further amazed…We have Room Three’s assembly in Week Six and Room One’s assembly in Week Ten.

Thank you everyone for your continuing support in bringing your children to school organised and prepared for school. We also appreciate your effort in ensuring that spelling homework is completed each week and home readers are returned on a regular basis.

Kind regards,

Angharad Daley, Sue Espie, Nicola Holt, Charlie Acton and Jay Gan.
