20 July 2016

Dear Mum,

This Term in class we are focusing on English, Health, History, Maths & Science. In English we are focusing on writing reports, recounts, letters & short stories. In History we are learning about 'The First Fleet'. In Science we are learning about Chemical Sciences. In Health we are learning about Health Advertisements (Communication of health messages). In Maths we are focusing on money, fractions, decimals, problem solving, angles, volume and capacity.

In English we are focusing on writing reports, letters & short stories. I'm looking forward to this.
This will help us to create more creative stories. It will also help us to add extra information.

In health we are learning about communication of health messages or health advertisement. This will help us to learn more about health.

In history we are going to be learning about ‘The First Fleet’. I have no idea about this but when I find out I will let you know.

In maths we are learning about lots of things. We are learning about money, fractions, angle, decimals, problem solving, volume & capacity. Maths helps to assist you in daily life.

In science we are learning about chemical sciences. I’m not really looking forward to this.
In my opinion science is really boring.

Term 3 this year is going to be really busy & fun. I'm looking forward to Term 3.
